Jet Propulsion Laboratory Edwards Facility,
Test Stand D, Workshop (Building 4222/E-23)
Edwards Air Force Base
Boron Vicinity
Kern County
California

HAER No. CA-163-G

Photographs by Brian Grogan, Yosemite
Photographics, Inc. December 1994/January 1995

- CA-163-G-1** View looking northeast at the west and south facades of Test Stand "D" workshop 4222/E-23. Test Stand "D" tower nitrogen tanks, television camera platform and access stairs are at right of image. Ductwork atop roof is for air conditioning system.
- CA-163-G-2** View looking southeast at north and west facades of Test Stand "D" workshop 4222/E-23, with Test Stand "D" tower in background and tunnel access shed to the right. Equipment on 4222/E-23 roof is for air conditioning.
- CA-163-G-3** View looking northwest down onto south and east facades of Test Stand "D" workshop 4222/E-23 from Test Stand "D" tower. Metal shed in background at right is not identified. Most of structures beyond fence belong to JPL solid propellant processing line. Note train of railroad hopper cars in distance.
- CA-163-G-4** Interior view of Test Stand "D" workshop 4222/E-23 looking southwest. Many tools and machines have been removed in process of dismantling Test Stand "D."
